UNIVERSAL A/C REMOTE CONTROL

Default Function

Product is available for: GREE (YBOF2), Mitsubishi 388, Midea, Toshiba, Chunlan, Haier, HuaLing

it's not working, please try to operate it with one of the methods below:

Setting Of The Remote Control

Brand point to point fast searching

Switch on the power of the air condition manually, align the remote control with the receiving window of the air condition.

Long press the CODE button until the air condition begins to automatically run with a voice of tick, and then release the button, and the setup is finished.

Button Brand Corresponding Table

⏻ ON/OFF	▲ TEMP+	▼ TEMP-	🌀 WIND
GREE/ HAIER	MIDEA/ TOSHIBA/ CHANGHONG	SHARP/ KELON	MITSUBISHI/ OTHERS
🔁 MODE	M.SWING	A.SWING	TIME ON
LG/ SAMSUNG	HITACHI/ PANASONIC	SANYO/ HISENSE	CHIGO/ DAIKIN
TIME OFF	F.Cool FAST COOLING	F.Heat FAST HEATING	
FUJITSU/ CARRIER	CHUNLAN/ AUX	SHINCO/ AUCMA	

Digital auto searching for the available type

Switch on the power of the air condition manually, align the remote control with the receiving window of the air condition.

Press and hold the "SET" button for 6 seconds until the type code has changed (+1), now it's in the mode of fast searching for the available type. Checking the status of your air condition and press "OK" button to finish the searching when the air condition starts automatically.

Check the function of the buttons whether working or not (except the TEMP+, TEMP- , TIME ON, TIME OFF, SET buttons). Press the "OK" button to finish if there is no problem and the code is effective, if not, press "SET" button to keep on searching.

Input the code manually

Switch on the power of the air condition manually, find out the type of your air condition and the first code from the code table. Take HAIER as an example.

Press and hold the "SET" button for about 3 seconds until the type code is flickering in the window, then press "TEMP+ " button until the code you need is on the window and flickering, the air condition will start up if the code is right.

Press "OK" button and then the code of the type will stop flickering.

Check the function of the buttons on the remote control to make sure there is no problem. The setup is finished if there is no problem. If not, repea the step 2-3.

Searching the code manually

Switch on the power of the air condition manually, align the remote control with the receiving window of the air condition.

Press and hold the "SET" button for about 3 seconds until the type code is flickering in the window, then press "TEMP+ " button one time. Checkig the status of your air condition and press "OK" button to finish the searching when the air condition tarts automatically.

Restore to factory settings

Press the "SET" + "WIND" 🌀 button at the same time and hold about 3 seconds to restore to factory settings.

Some of the remote contrl have the functions below
(refer to the panel f the remote control)

FAST COOLING, FAST HEATING button

Air condition will be set to the cooling mode by pressing the "FAST COOL" button, the temperature is , strong wind, automatic direction.

Air condition will be set to the heating mode by pressing the "FAST HEAT" button, the temperature is , strong wind, automatic direction.

the mode of heating, press the 'E A Heating button to start the electrical heating function. This tion is suitable for some models.

Set the CLOCK function

Press the "CLOCK" button (about 3 seconds) to g in the mode of clock setting and then the clock is ering, adjust the time by pressing the "TEMP+ button and the "TEMP-" button. Press the "CLOCK" on again to exit.

TIME ON/OFF function

ipped with the original remote control timing funion, the timing indicator light of the air condition will up after pressing the "TIME ON" or "TIME OFF button, and it means that the air condition is working he timing status.

Note:
n combination code has no timing function whet is switched on, please find the appropriate type ording to the set-method (one of the A B C D) in n Instruction Manual.

he TIME ON function of some types is only availa in the shutdown mode.
